👤 PROFILE

Dedicated and results-oriented Software Engineer with a passion for continuous learning and innovation. I leverage a solid foundation in software development and problem-solving to deliver high-quality, scalable solutions. I am committed to enhancing user experience and exceeding the expectations of both external clients and internal stakeholders. Skilled at balancing technical excellence with a customer-focused approach, I strive to ensure seamless and impactful outcomes.

💼 EMPLOYMENT HISTORY

Senior Software Engineer at POWER Engineers
April 2024 — Current

I am a Senior Software Engineer at POWER Engineers, where I develop new tools to help our Field Technicians and Electrical Engineers manage their numerous projects more effectively. I utilize Smartsheet and its API to create programs in Python and C# to support continuous integration and continuous deployment (CI/CD) of projects. Additionally, I mentor interns, guiding them as they learn about agile methodologies, version control with Git, and various programming languages such as C# and Python.

Software Engineer IV at Prime Therapeutics
April 2024 — Current

I worked as a Software Engineer at Prime Therapeutics, where I specialized in full-stack development with expertise in .NET, SQL, and EDI. I am proficient in agile methodologies, effectively organizing and prioritizing development tasks through sprints. Additionally, I have experience using tools such as AWS, GitHub, and Insomnia to enhance development workflows and maintain strong version control.

Software Developer at DeRoyal, Powell, TN
September 2022 — April 2024

I worked as a Software Developer at DeRoyal, where I was responsible for designing and managing web applications using .NET, SQL, and PERL. I delivered comprehensive EDI solutions through development mapping, backend support, and ongoing maintenance. I also played a key role in creating detailed EDI documentation, establishing a strong foundation for seamless and sustainable EDI support.

Tier I IT Support Specialist at SAIC, Oak Ridge
December 2020 — April 2021

I served as an IT Support Specialist for the Department of Defense through SAIC, delivering comprehensive desk support to address a range of issues including administration, software, systems, and network challenges. I collaborated with a team to accurately diagnose problems, identify root causes, and direct issues to the appropriate resources for efficient resolution. I am skilled at providing reliable technical support to ensure mission-critical operations run smoothly.

Combat Medic at the United States Army, Fort Bragg
Active Duty from September 2017 to December 2019

I served as a Combat Medical Support Specialist in the military, where I provided essential medical assistance to teams and battalions at aid station settings. I was instrumental in developing new medical inventory database systems that enhanced operational efficiency. Additionally, I managed SharePoint administration and provided computer and network support to ensure seamless communication and functionality of the systems
